

Lawn Maintenance Services

Spring Cleanup (Performed once April 1 – May 5 weather permitting)

Power blow/rake leaves from shrub/rock areas, decks, walks, corners etc.

Go over lawn with mower with metal tine rake attachment to loosen leaves.

Load and haul debris collected.

Roof Gutter Cleaning (Performed April 1 – May 5 & October 15-Nov 5 weather permitting)

Blow leaves from eave troughs at time of spring/fall cleanup. Pickup & haul debris collected.

Single story homes without gutter guards only. We usually do not use the homeowners hose to wash down drainspouts (unless really requested and homeowner leaves their hose out)

As always in MN, a season ending snowfall may prohibit late gutter cleaning.

Mowing (Scheduled weekly May 1 – October 10 weather permitting)

Scheduled Monday-Thursday by area. No mowing is scheduled for Fridays – this is a catch-up day for delays caused by rain, holidays etc. Includes mowing the grass, trimming around trees and obstacles, and blowing off hard-surfaces when completed. We use 21” to 44” mowers.

We mostly mulch (no bagging). Returns nutrients to the soil & keeps ground temps lower.

Shrub Trimming (Performed twice per season June 10 – July 4 & August 15-October 15)

Trim shrubs, blow/rake up debris, cleanup debris. Includes up to two hours on-site labor, hauling & disposal site fees. Shrubs in full bloom will not be trimmed: spirea, potentilla, hydrangea, weigelia are therefore often only trimmed in the fall.

Edging (Performed usually twice per season June & August)

Power edge cement walk, driveway, and curbs. (no asphalt edging)

Load and haul debris collected.

Fall Cleanup (Performed once October 15 – November 5 weather permitting)

Power blow/rake leaves from shrub/rock areas, decks, walks, corners etc.

Go over lawn with mower for a final cutting and leaf pickup. Load and haul debris collected.

Lawns are routed by area. As always in MN, a season ending snowfall may prohibit late fall-cleanups.
